

ICC Announces Acquisition of Cubex Inc
ICC acquires Fort Mill's-based Cubex Engineering

St. Louis, MO (August 28, 2017) – ICC, Inc., a St. Louis-based engineering and management consulting firm, is pleased to announce the acquisition of Cubex **Inc** based in Fort Mill, South Carolina. Cubex is a well-known consultant in 3D design technology and provides engineering and design services for a variety of industries.

“We are excited to welcome Cubex into the ICC family. The expertise of Cubex’s dedicated and talented team will be an invaluable asset and will further strengthen ICC’s capabilities to provide best-in-class facilities,” said Anders Hummer, President of ICC Inc. “This acquisition fully aligns with ICC’s goals of expanding further into the Southeast US market.”

ICC and Cubex share many of the same core values such as a thorough approach to projects, respectfulness of client team views and desires, and customizing solutions for clients. ICC and Cubex are committed to working seamlessly through the integration process to remain focused on client needs and further strengthening their services.

“Becoming part of the ICC group will enable us to provide our clients with a wider range of services, including High Definition 3D laser scanning services, process engineering, EPCM (Engineering, Procurement, and Construction Management) and Turnkey Production Facilities,” said Richard Manley, President of Cubex. “We are very pleased with the opportunity to leverage synergies while delivering even greater value to our clients.”

All Cubex professionals will remain in their current roles and will continue to operate from the existing Cubex offices.

ICC and ICC Turnkey are providers of engineering and management consulting services. Headquartered in St. Louis (USA) the ICC group offers a wide range of services –from greenfield factory design to here-and-now production line adjustments. Learn more at www.icc-inc.net.
